WORDS FROM THE CHAIR

*Alain CADEC
Chair of Committee on Fisheries*

Dear Colleagues,

Dear Friends,

After the summer break, it is time for our Committee to take up its work again.

We have many important files to finalise: the Technical Measures, the North Sea management plan, other management plans to come, the revision of the Control Regulation etc.

Parliament is bearing a large responsibility for the successful implementation of the Common Fisheries Policy over the next two years.

We have the privilege of being part of a legislative Committee that is dealing with very concrete issues of competition and sustainability in marine and coastal areas. Therefore, I wish to all Members, whose commitment and dedication I welcome, a fruitful work.

I also wish to thank the secretariat, the political advisors, our assistants and the legal service for their remarkable work with us.

Together, let us continue to make the Common Fisheries Policy an outstanding European policy!

Alain CADEC

North Sea plan: ensuring sustainable stocks and security for fishermen

(12/07/2017)

Plans to tackle overfishing and offer more security to local fishermen by introducing multiannual fishing quotas in the North Sea were backed by MEPs on Wednesday 12 July.

The second multiannual fisheries plan under the new Common Fisheries Policy (CFP) would manage the fisheries of demersal species living near the bottom of the sea and accounting for 70% of catches in the North Sea. The management approach covers different species and is tailored to the complexity of North Sea mixed fisheries, which makes it impossible to target and catch only one species. The long-term sustainable exploitation of these stocks will guarantee the security of fishing opportunities and the livelihoods of fishermen.

The new rules would:

- set the ranges (minimum-maximum) within which the Council can set the yearly Total Allowable Catches (TACs) and quotas
- achieve maximum sustainable yield (MSY) at the latest by 2020 for all stocks affected by this regulation
- base all measures on the best available scientific advice as reviewed by the International Council of Exploration of the Sea (ICES) or the Scientific, Technical & Economic Committee for Fisheries (STEFEC)
- suspend the targeted fishery for one particular stock and reduce fishing opportunities when scientific advice indicates a stock is in danger
- cover also recreational fisheries.

Estonian Presidency priorities discussed in committees

(12/7/2017)

The priorities of the Estonian Presidency of the EU Council of Ministers have been outlined to parliamentary committees by ministers in a series of meetings that took place in July.

The two key priorities in Fisheries the sector (North Sea, Adriatic) are the sustainable management of fish stocks and the protection of the oceans. The Presidency will start negotiations on the North Sea multiannual plan and the technical measures regulation as soon as the EP plenary approves its position, as well as try to move discussions forward on the Multiannual plan for the small-pelagic stocks in the Adriatic.

MEPs and ministers strike informal deal to ban deep sea fishing below 800 meters

(30/6/2017)

MEPs and ministers struck a deal on a ban on fishing below a depth of 800 meters in the North-East Atlantic. The ban will apply to bottom trawling and would also restrict deep-sea fishing to the area where it took place between 2009 and 2011.
